WEATHER KEY POINTS

04/27/22 - 05/03/22

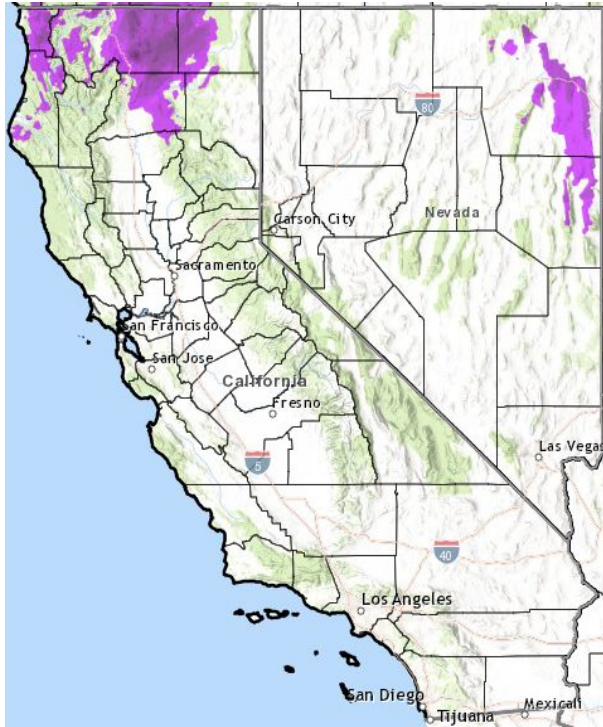

Wednesday - Tuesday

- Minor heat impacts continue to be possible across southern California through Wednesday, then spread across Southern and Inland regions Friday through early next week.
- Gusty west to northwest winds are likely starting Wednesday night and continuing through late Thursday evening.
 - Strongest gusts expected near the Bay Area and across the southern desert areas, with gusts of 45-60 mph.
 - Additional storms passing primarily north of the state could lead to additional breezy to windy conditions through the weekend and into the beginning of next week.
- Dry weather is expected for the majority of the state through the week, except for some light rain showers over far northern California early next week

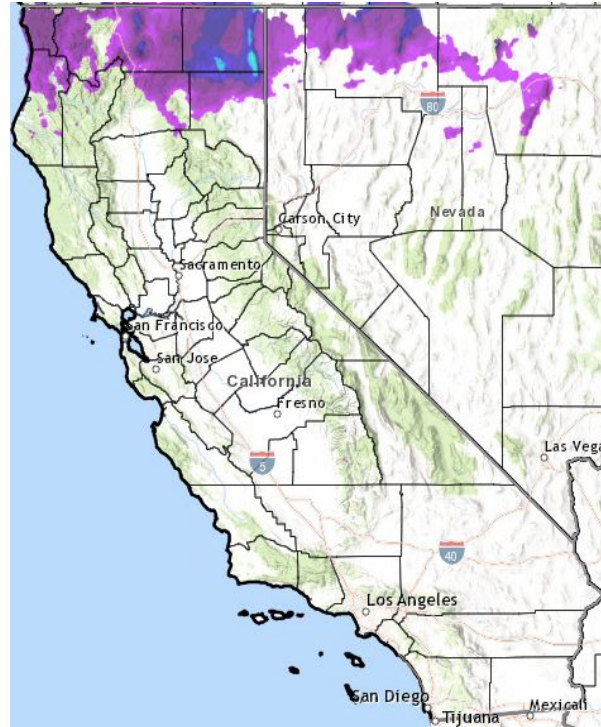

PRECIPITATION FORECAST

04/27/22 - 04/29/22

Wednesday

Thursday

Friday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

WEATHER OUTLOOK

05/02/22 - 05/10/22

6-10 Day Outlook (May 2 - May 6)

Temperatures

- Below normal temperatures are favored for the northern half of California, with near normal temperatures favored for the southern half of California

Precipitation

- Near normal precipitation is favored for most of the state, except far northern California where above normal precipitation is slightly favored

8-14 Day Outlook (May 4 – May 10)

Temperatures

- Near normal temperatures are favored for much of the state, except for below normal temperatures favored for far northern California

Precipitation

- Near normal precipitation is favored for most of the state, except far northern California where above normal precipitation is slightly favored
